## 361° FLAME

As part of the commitment to support athletes to perform beyond their expectations, 361° is launching their first carbon fiber plated shoe, the 361° Flame.

The Flame is a lightweight premier racing shoe fitted with a carbon fiber plate and a newly developed PU based midsole that returns a snappy and responsive running experience, allowing athletes to go faster than ever before.

To design a shoe that provides runners with extra propulsion and a super responsive ride, 361° developed the QU!KBALANCE system. This

is an innovative combination of two layers of super light QU!KFLAME foam enclosing the QU!KBONE full-length carbon plate. Within this system, the QU!KBONE plate is strategically angled so that it provides extra propulsion in the toe-off phase of the athlete's foot.

Combining this underfoot technology with a featherweight mono mesh upper, lightweight heel construction and a pressure-free tongue, the 361° Flame helps athletes achieve new goals and chase down their PR's.

The 361° Flame is designed and developed for athletes and with a weight of 218 grams (Men's US9) and an 8mm drop, the shoe is tailored for speed. This is a sleek and efficient racing shoe with an aggressive setup that will be most beneficial for elite performers.

The 361° Flame is best suited to racing or tempo runs of distances up to a marathon.

361° is here to support athletes to perform beyond their expectations. Get outside their comfort zone and set a new PR, the 361° Flame will help them do just that.

### MEN

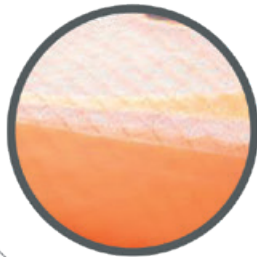

**SIZE:** 7, 8, 8.5, 9, 10, 11  
**WEIGHT:** 218 g  
**DROP:** 8MM  
**STACK:** 24-32

### WOMEN

**SIZE:** 6.5, 7.5, 8.5, 9.5, 10, 10.5, 11.5  
**WEIGHT:** 188.5 g  
**DROP:** 8MM  
**STACK:** 24-32

### Lightweight Mono Mesh Upper

Designed to provide a secure and comfortable fit, the ultra-lightweight upper wraps the foot with internal support.

Removes pressure and stress from the top of the foot during dorsiflexion by combining super-soft materials with an anatomical pattern.

### NEW DESIGN

#### Advanced Collar Structure

The heel is comfortably secured during fast runs by a heel collar lined with specifically designed foam, which also helps reduce weight.

## UPPER DESIGN PLATFORM DESIGN

### Anti-Slip Outsole

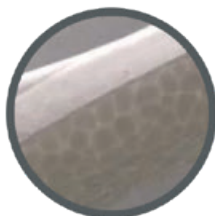

Traction and control off the mark from a high-tack grip front sole.

### NEW TECHNOLOGY

#### QU!KFLAME

Newly developed PU midsole material that is extremely springy and 45% lighter than traditional EVA while still being durable enough to maintain responsiveness.

Hardness: 45C,  
Rebound: 65%,  
Density: 0.135g.

### NEW TECHNOLOGY

#### QU!KBONE

Engineered full length carbon fiber plate strategically positioned between two layers of QU!KFLAME and tuned to provide assisted propulsion and energy return throughout the running gait.

Thickness: 0.8mm  
Hardness: 88D, made by carbon fiber  
Angle: toe spring 26.2mm

### NEW TECHNOLOGY

## QU!KBALANCE

Platform Construction System
